Economic Forecast

January 2010 Consensus Economic Forecast Highlights

Real Gross Domestic Product will increase by 2.2% in 2010 and by 2.7% in 2011. This follows a 2.6% decline in 2009.

Light vehicle sales will total 11.2 million units in 2010 and 12.5 million units in 2011. Light vehicle sales totaled 10.3 million units in 2009.

The Detroit three companies' share of total light vehicle sales is estimated at 41.1% in 2010 and 39.6% in 2011. During 2010 light vehicle sales from the Detroit three companies will total 4.8 million units. During the mid 1990s, sales from the Detroit three companies totaled 11.0 million units.

United States housing starts totaled 0.6 million units in 2009, but are expected to increase to 0.7 million units in 2010 and 1.1 million units in 2011. United States housing starts averaged 2.0 million units during the 2004 through 2006.

Michigan wage and salary employment will decline by 2.2% in 2010 and by 0.9% in 2011. Michigan wage and salary employment declined by 6.8% in 2009.

On an annual basis, Michigan wage and salary employment has declined by nine consecutive years through 2009. The current forecast of continuing decline in wage and salary employment in 2010 and 2011 will lead to 11 consecutive years of annual wage and salary employment decline in Michigan.

As of November 2009, Michigan has lost 831,500 wage and salary jobs from the June 2000 peak, a decline of 17.7%. By the time wage and salary employment begins to improve in Michigan, late in 2011, Michigan will have lost close to 1.0 million jobs over the past 11 years.

Michigan transportation equipment manufacturing employment is expected to continue to decline in 2010 and 2011. By the fourth quarter of 2011, employment in this critical industry will be down 74.2% or 260,900 jobs from the level in the second quarter of 2000.

Michigan personal income is expected to decline by 2.7% in 2009 and rise by 1.0% in 2010 and 1.7% in 2011. The 2.7% decline in personal income in 2009 will be the first decline since 1958 and the worst drop since 1945.

Revenue Estimates

Consensus Revenue Estimates

General Fund/General Purpose (GF/GP)

- **FY 2008-09:** Revenue from ongoing sources totaled \$7.4 billion, which is down by \$2.0 billion or 21.3% from FY 2007-08.
- **FY 2009-10:** Revenue from ongoing sources will total \$6.9 billion, which is down \$467.2 million or 6.3% from FY 2008-09. Over two fiscal years, GF/GP revenue has declined by \$2.5 billion or 26.3%.

The major reasons for these steep revenue declines are the impact of the economic recession on Michigan, the severe difficulties in the motor vehicle sector, and changes in Michigan tax laws, such as the new earned income tax credit and the tax subsidies to the film industry.

- **FY 2010-11:** Revenue from ongoing sources will total \$7.0 billion, which is up \$70.0 million or 1.0% from the FY 2009-10.

School Aid Fund (SAF)

- **FY 2008-09:** Earmarked tax and lottery revenue will total \$10.9 billion, which is down by \$590.7 million or 5.1% from FY 2007-08.
- **FY 2009-10:** Earmarked tax and lottery revenue will total \$10.5 billion, which is down by \$464.1 million or 4.2% from FY 2008-09. Over two fiscal years, SAF revenue has declined by \$1.1 billion or 9.2%.
- **FY 2010-11:** Earmarked tax and lottery revenue will total \$10.5 billion, which is up \$22.4 million or 0.2% from FY 2009-10.

Figure 1

Constitutional State Revenue Limit

Section 26 of Article IX of the State Constitution of 1963, limits State revenue collections to a maximum of 9.49% of the level of Michigan Personal Income. This Constitution provision, put in place by Michigan voters in 1978, limits the size of State government to the level that occurred in FY 1978-79.

During FY 1999-2000, actual State revenue collections exceeded the constitutional revenue limit by \$159.7 million. Actual fiscal year 1999-2000 revenue equaled 9.55% of Michigan Personal Income.

During FY 2009-10, State revenue collections are estimated to be \$8.9 billion under the constitutional revenue limit. Estimated FY 2008-09 revenue will equal 6.93% of Michigan Personal Income.

This means that the size of State government in Michigan over the past nine fiscal years has contracted in a very significant manner. The Legislature and the Governor could raise State taxes by \$8.9 billion currently and still not be over the constitutional revenue limit. The current level of State revenue collected is now 26.9% under the constitutional revenue limit.

This decline in State revenue over the past 10 fiscal years results from a combination of tax reductions enacted into law, i.e., income tax rate reduction, earned income tax credit, film credit, and the fact that the current tax base of the State is not responsive to economic activity.
